CRA 프로젝트에 적용하기

- 1. yarn add antd
- 2. App.js 참조 경로에 antd/dist/antd.css 추가하기

```
import React from 'react';
import { Button } from "antd";
import "antd/dist/antd.css";
import "./App.css";
function App() {
 return (
    <div className="App">
      <Button onClick={() => console.log("Hello!")}>
        Hello, Ant Design.
      </Button>
    </div>
export default App;
```

https://ant.design/docs/react/use-with-create-react-app

```
/* CSS 에서 참조할려면? */
@import "~antd/dist/antd.css";
```

Hello, Ant Design.

Life is short.
You need Python and Django.

I will be your pacemaker.
